

# Job Openings at DMark Lasers

**Production Engineer:** As a Service Engineer at DMark Lasers, you will be at the forefront of customer satisfaction, providing technical support and ensuring the optimal performance of our laser systems. Your responsibilities include diagnosing and resolving technical issues, conducting routine maintenance, and delivering training to clients. You will work closely with the service team to enhance product reliability and customer experience. The ideal candidate has a solid technical background, excellent problem-solving skills, and a commitment to delivering exceptional service in the field of laser technology.

## Skills Required:

### 1. Manufacturing Knowledge:

- In-depth understanding of manufacturing processes, specifically related to laser systems and precision equipment.

### 2. Technical Proficiency:

- Strong technical skills in engineering, with a focus on production processes and quality control.

### 3. Problem-Solving Abilities:

- Excellent problem-solving skills to identify and address issues in the production workflow.

### 4. Attention to Detail:

- Keen attention to detail to ensure the precision and quality of laser systems during the manufacturing process.

### 5. Process Optimization:

- Ability to optimize production processes for efficiency and quality improvement.

### 6. Team Collaboration:

- Collaborative mindset to work closely with cross-functional teams, including design, engineering, and quality assurance.

### 7. Project Management:

- Project management skills to coordinate and oversee production schedules, ensuring timely delivery of products.

## 8. Documentation:

- Accurate and thorough documentation of production processes, including specifications, procedures, and quality control measures.

## **Eligibility and Education:**

### 1. Educational Background:

- A bachelor's degree in engineering, preferably in mechanical engineering, electrical engineering, or a related field.

### 2. Experience:

- Relevant work experience in production engineering, preferably in the manufacturing of laser systems or similar precision equipment.

### 3. Certifications:

- Certifications in production engineering, quality control, or related fields are advantageous.

### 4. Lean Manufacturing:

- Familiarity with lean manufacturing principles for efficient and streamlined production.

### 5. Quality Management:

- Understanding of quality management systems and practices.

### 6. CAD/CAM Skills:

- Proficiency in Computer-Aided Design (CAD) and Computer-Aided Manufacturing (CAM) software.

### 7. Communication Skills:

- Effective communication skills to coordinate with various teams and convey production-related information.

DMark Lasers encourages individuals with a passion for precision engineering and manufacturing to apply for the Production Engineer role.
